Summary

Self-taught and university educated web developer and information/networking specialist with extensive knowledge of the web stack (server, data modeling, business logic, user experience) and Web 2.0 technologies as well as network infrastructure, architecture and security. Cognizant of the role that information plays in a business and in society; able to take a creative, problem solving approach to both programming and information management issues. Dedicated to providing a link between customers and the information resources they need with a strong understanding of information policy, ethics, and organization/research methodologies. Familiar with multiple compiled and interpreted programming languages (e.g. Python, JavaScript), database technologies, networking equipment and security practices and Linux system administration. I am bilingual, able to read and write in both English and Spanish.
